Production de la fonte brute, collection, 15 pièces

A collection of 15 samples in a wooden case 230 x 280 mm, with plastic inserts measuring 45 x 60 mm.The collection contains 15 selected, typical samples of raw materials, intermediate stages and final products in steel production. The collection is particularly suitable for explaining the blast furnace process and steel refining, since the progress from the raw ore to the ultimate steel products is shown quite clearly.The chemical compositon is indicated for all specimens.
